Continuation of Substance of Interview including description of the general nature of what was discussed: Discussed that the argument regarding Poirier et al. only having a semiconductor piezoelectric material and not an insulating piezoelectric, was convincing but only pertinent to claim 1 and not claim 10. The Examiner agreed that claim 10 would be allowable if the claim required the piezoelectric material to be --insulating--. Applicants responded on 10/13/03, and agreed to the addition of --insulating-- before "material" on lines 4 and 10 of claim 10. The agreed upon changes are made by the accompanying Examiner's Amendment. .
